

FMR Data Collection

NAME AND SURNAME :

AGE:

Facial analysis (for Smile design)

Horizontal reference ☐ Pupils ☐ Lips ☐ Others
Vertical reference ☐ Face central line ☐ Others

Dentolabial analysis

Lip length ☐ Short ☐ Long ☐ Average
Lip shape ☐ Thin ☐ Full
Smile exposure ☐ Low ☐ Average ☐ High ☐ Gummy Smile
Buccal corridor space ☐ Present ☐ Not Present
Anterior occlusal plane orientation ☐ Straight ☐ Inclined

Dental analysis

Maxillary incisal edge visibility at rest mm
Posterior occlusal plane orientation ☐ Acceptable ☐ Modify ☐ Supraeruption
Maxillary central incisor width mm length mm
Teeth colour ☐ Acceptable ☐ Modify ☐ Developmental causes

Intra-arch analysis - select if needs modifying

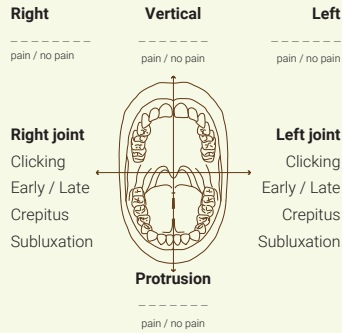

☐ Midline ☐ Crowding ☐ Diastema ☐ Rotations ☐ Crossbite

Gingiva analysis

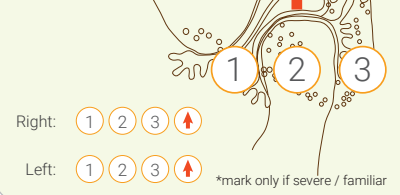

Gingival zenith symmetry ☐ Acceptable ☐ Modify
Gingival scallop form ☐ Flat ☐ Normal ☐ High

Esthetics

TMJ Mobility*

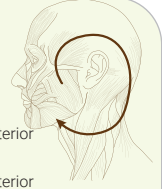

TMJ Pain*

Muscle Pain

☐ ☐ Masseter
Temporals:
• Right ☐ Anterior ☐ Middle ☐ Posterior
• Left ☐ Anterior ☐ Middle ☐ Posterior

2D/3D RADIOLOGY

☐ ☐ Caries
☐ ☐ Periapical lesions
Periodontal bone loss
☐ ☐ Localized
☐ ☐ Generalized
☐ ☐ Peri - implant bone loss
☐ ☐ Bone dimension for prosthetically guided implants
☐ ☐ Maxillary sinusitis
☐ ☐ Other bone pathologies

Imaging

Airway restriction

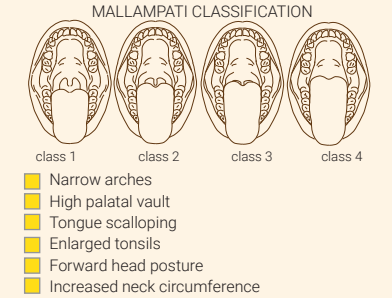

TMJ ANALYSIS

CBCT
☐ ☐ Erosion of cortical bone
☐ ☐ Narrowing of the joint space
☐ ☐ Significant deviation from central position
☐ ☐ Abnormal size of the condyle

MRI

Disc displacement
☐ ☐ With reduction
☐ ☐ Without reduction, with limitation
☐ ☐ Without reduction, without limitation
☐ ☐ Effusion

Obstructive Sleep Apnea

Periodontium

CPITN 0-4 / *
☐ ☐ Periodontal phenotype (THICK / THIN)
☐ ☐ Gingival recession
☐ ☐ Violation of the supracrestal tissues
☐ ☐ Tooth hypermobility
☐ ☐ Oral hygiene
☐ ☐ Attached Keratinized Mucosa (AKM) around teeth
☐ ☐ Attached Keratinized Mucosa (AKM) for implant placement

Incisal relationship

☐ Class 1 ☐ Class 2 ☐ Class 3

Overbite ☐ 2-4mm ☐ >4mm ☐ <2mm
Overjet ☐ 0-3mm ☐ >3mm ☐ <0mm
☐ Positive CCP test ☐ Fremitus present
Is the bite repeatable ☐ Yes ☐ No

Occlusion

Dental Condition

☐ Defective restorations
☐ Remaining tooth structure without ferrule
☐ ☐ Erosion ☐ ☐ Attrition ☐ ☐ Abrasion
☐ Carious Lesions
☐ Periapical disease
☐ Missing teeth
☐ Hypodontia

DIAGNOSIS / BASED ON 1. INTERVIEW 2. EXAMINATION 3.IMAGING

TMD

Functional Disorders

☐ Acceptable function
☐ ☐ Hypermobility of the condyles
Restriction due to:
☐ Muscle / TMJ ☐

Disc displacement:

☐ ☐ With reduction
☐ ☐ With catching
☐ ☐ Without reduction with limitation
☐ ☐ Without reduction without limitation

Degenerative TMJ disease:

☐ ☐ Active
☐ ☐ Stable

Pain Disorders

☐ No pain
☐ Local myalgia (acute)
☐ Myofascial pain with referral
☐ Muscle spasm
☐ Centrally mediated myalgia (chronic)
☐ Arthralgia

PERIODONTAL

☐ Healthy Periodontium
☐ Gingivitis
☐ Periodontitis / Periimplantitis
☐ Recession
☐ Implant requires soft&hard tissue management

OCCUSION

☐ Stable repeatable bite
☐ Primary occlusal trauma
☐ Constricted chewing pattern
☐ Unrepeatable bite
☐ Occlusal dysesthesia
☐ Orthodontic disorder

DENTAL

☐ Healthy tooth structure
☐ Caries ☐ Periapical lesion
Erosion ☐ Active ☐ Stagnant
Attrition ☐ Active ☐ Stagnant
Abrasion ☐ Active ☐ Stagnant
☐ Compromised with enamel or ferrule
☐ Compromised without ferrule

ESTHETICS

☐ Acceptable
Easy to improve with prosthodontics
☐ Unacceptable
Necessary interdisciplinary treatment
☐ Internal discoloration
☐ Lip hypermobility
☐ Altered passive eruption
☐ Too short / Long lip
☐ Maxillary excess

Other common orofacial pains:

☐ Sinusitis
☐ Pulpal pain
☐ Tension type headache
☐ Neuropathic pain
☐ Migraine
☐ Psychogenic pain
☐ Other:

RISK FACTORS

☐ Ongoing eating disorder
☐ History of TMD problems
☐ Bruxism ☐ Muscle hypertrophy
☐ Occupational hazard
☐ Autoimmune diseases
☐ Otolaryngologic disorders
☐ Lip incompetence
☐ Tongue thrust
☐ Obstructive sleep apnea
☐ History of unsuccessful procedures
☐ Chronic stress / PTSD / Depression
☐ Neurologic disorders / Migraines
☐ Other systemic conditions
